CANDICE JEEYOUNG HAN

FULLSTACK SOFTWARE DEVELOPER

INTRO

Hello, I'm a self-taught full-stack developer.
After working in International trade and Marketing for 3years, I decided to change my career path to Software engineering.

I build responsive websites and apps using JavaScript, HTML/CSS for the frontend, and with Django, ReactJS and Java for the backend.
I like coding because it fits with my personality well, it makes me deeply concentrated on what I do, and it gives me a lot of joy when I have things finally worked out.

MY PORTFOLIO SITE

To see recently done projects,
